DESCRIPTION.

The Roots are ſmall, reddish, full of Fibres, that from Runners abo
shoot Fibres downward, and Leaves upward, of a middling Green, jagg'd, whiter
The Stalks rise to ſupport the Fruit above the Leaves, which from three upon one Foot
to one near the Fruit. The Empalement 2 is a very light whitish Green, set with whi
divided into ten pointed Parts. The Flowers 3 have five white Leaves, in the Cente
is the young Fruit: at 4 'tis cut through to shew the Embrio of the Fruit, with the
Outside, with every one a Yellow Pistil, with reddish Yellow Tops; the Hives are n
Summits cover'd with a Yellow Farina; the ripe Fruit has many light-colour'd
on their Outside, one of each Sort is over the Fruit that produced it. The Scarle
5, the Wood 6, which is a deeper Red, and the Hoboy 7, of which there are two Sor
Black, the other White: 8 shews a Fruit cut Longitudinally, 9 another Transversly
is whitish.

VIRTUES.
